

DATABASE [SQL] ASSIGNMENT-4 -- [Solutions]

IV. Create a Table for Library Information: (for questions from 31 to 40) Table name: Library

Constraints: BookId is primary key and BookName is NOT NULL

BookId (Primary Key)	BookName	Author	Date Purchased	Publisher	Price
B101	CostAccounting	Jain Narang	11-Feb-13	Kalyani	800
B102	Business Statistics	OPAggarwal	22-Dec-11	Himalaya	750
B103	Rdbms	CJDate	2-Mar-15	TMH	900
B104	MgmtAccounting	RKSharma	19-Apr-16	Kalyani	450
B105	Operating Systems	Galvin	25-Nov-13	PHI	750
B106	Advanced Accounting	SC Gupta	16-Apr-18	Himalaya	600

Solutions:

(i). Below are the steps to be followed. Create a new table “Library” as follows.

Query: Create table Library (Bookid varchar2(5) primary key, BookName varchar2(15), Author varchar2(10), DatePurchased date, Publisher varchar2(10), Price number(5));

OUTPUT: Table Created.

(ii). Insert 6 records in the above table by using “Insert Query” as shown below

Query: insert into library values(&Bookid, '&BookName','&Author',&DatePurchased', '&Publisher',&Price);

OUTPUT: Record inserted.

(iii) Display the output as mentioned below:

Query: Select * from library; **OUTPUT:**

OUTPUT:

BookId	Book Name	Author	Date Purchased	Publisher	Price
B101	Cost Accounting	Jain Narang	11-Feb-13	Kalyani	800
B102	Business Statistics	OP Aggarwal	22-Dec-11	Himalaya	750
B103	Rdbms	C J Date	2-Mar-15	TMH	900

B104	Mgmt Accounting	RK Sharma	19-Apr-16	Kalyani	450
B105	Operating Systems	Galvin	25-Nov-13	PHI	750
B106	Advanced Accounting	SC Gupta	16-Apr-18	Himalaya	600

31. Write sql query to display the list of authors from Himalaya publications.

Solution: Below are the steps to be followed.

To display the list of authors from Himalaya publications. Write the Query as under.

Query: Select BookName, Author, Publisher from Library Where Publisher='Himalaya';

OUTPUT:

Book Name	Author	Publisher
Business Statistics	OP Aggarwal	Himalaya
Advanced Accounting	SC Gupta	Himalaya

32. Write sql query to display the total cost of books purchased Publisherwise.

Solution: Below are the steps to be followed.

To display the total cost of books purchased Publisherwise. Write the Query as under.

Query: Select Sum(Price) from Library where Publisher='Kalyani';

OUTPUT: Sum(Price) = 1250.

Query: Select Sum(Price) from Library where Publisher='Himalaya';

OUTPUT: Sum(Price) = 1150.

Query: Select Sum(Price) from Library where Publisher='TMH';

OUTPUT: Sum(Price) = 900.

Query: Select Sum(Price) from Library where Publisher='PHI';

OUTPUT: Sum(Price) = 750.

33. Write sql query to count the total number of books under Kalyani publications.

Solution: Below are the steps to be followed.

To count the total number of books under Kalyani publications.

Write the Query as under.

Query: Select Count(BookId) from Library where Publisher='Kalyani';

OUTPUT: Count(BookId) 2

34. Write sql query to rename the column Publisher as Publications.

Solution: Below are the steps to be followed.

To rename the column Publisher as Publications.

Write the Query as under.

Query: Alter table Library Rename Column Publisher To Publications;

OUTPUT: Table Library.

Column Name	Datatype(Size)
BookId	Varchar2(5)
Book Name	varchar2(15)
Author	varchar2(10)
Date Purchased	varchar2(10)
Publications	varchar2(10)
Price	number(5)

35. Write a sql query to display the books in the ascending order of DatePurchased.

Solution: Below are the steps to be followed.

To display the books in the ascending order of Date Purchased.

Write the Query as under

Query: Select BookId, BookName, DatePurchased from Library Orderby Date Purchased Asc;

OUTPUT:

BookId	Book Name	Date Purchased
B102	Business Statistics	22-Dec-11
B101	Cost Accounting	11-Feb-13
B105	Operating Systems	25-Nov-13
B103	Rdbms	2-Mar-15
B104	Mgmt Accounting	19-Apr-16
B106	Advanced Accounting	16-Apr-18

36. Write sql query to create an index on the fields BookName and Author.

Solution: Below are the steps to be followed.

To create an index on the fields BookName and Author.

Write the Query as under.

Query: Create Index Idx_Library ON Library (BookName, Author);

OUTPUT:

Index Created

1.55 Seconds

37. Write sql query to display the books whose price is between 500 and 700.

Solution: Below are the steps to be followed.

To display the books whose price is between 500 and 700. Write the Query as under

Query: Select * from Library where Price between 500 and 700;

OUTPUT:

BookId	Book Name	Author	Date Purchased	Publisher	Price
B106	Advanced Accounting	SC Gupta	16-Apr-18	Himalaya	600

38. Write sql query to increase the price of all the books by 200 for publishers other than Himalaya or Kalyani.

Solution: Below are the steps to be followed.

To increase the price of all the books by 200 for publishers other than Himalaya or Kalyani.

Write the Query as under.

Query: Update Library Set Price = Price + 200 where Publisher = 'TMH' and 'PHI';

OUTPUT:

BookId	Book Name	Author	Date Purchased	Publisher	Price
B101	Cost Accounting	Jain Narang	11-Feb-13	Kalyani	800
B102	Business Statistics	OP Aggarwal	22-Dec-11	Himalaya	750
B103	Rdbms	C J Date	2-Mar-15	TMH	1100
B104	Mgmt Accounting	RK Sharma	19-Apr-16	Kalyani	450

B105	Operating Systems	Galvin	25-Nov-13	PHI	950
B106	Advanced Accounting	SC Gupta	16-Apr-18	Himalaya	600

39.Write sql query to display the book details where author name contains the name Sharma.

Solution: Below are the steps to be followed.

To display the book details where author name contains the name Sharma. Write the Query as under.

Query: Select * from Library where Author = 'Sharma';

OUTPUT

BookId	Book Name	Author	Date Purchased	Publisher	Price
B104	Mgmt Accounting	RK Sharma	19-Apr-16	Kalyani	450

40.Create a view to display the fields BookId and BookName where the Publisher is Himalaya.

Solution: Below are the steps to be followed.

A view to display the fields BookId and BookName where the Publisher is Himalaya.

Write the Query as under.

Query: Create View [Library Book] As Select BookId, BookName from Library Where Publisher = 'Himalaya';;

OUTPUT:

Name of View	Records
Library Book	2
